

The OPS Assessment

\$997 · 2 weeks · full operational diagnostic + 90-day roadmap

Most home service owners hit a ceiling between \$2M and \$10M. Revenue keeps climbing but profit doesn't, and the owner is the bottleneck — every estimate, every approval, every fire runs through one person. The OPS Assessment is a two-week diagnostic that finds exactly where operations leak time and margin, then hands you a prioritized 90-day plan to fix it.

WHAT YOU GET

- **Operational diagnostic** across job costing, scheduling, cash flow, sales handoff, and team accountability.
- **Scorecard** rating each function so you see the weak points at a glance.
- **Prioritized 90-day roadmap** — what to fix first, second, third, with the cost of inaction named.
- **KPI baseline** — the 5–7 numbers you should run the business on.
- **Quick wins** you can act on the week we finish.

WHAT WE LOOK FOR

- No job costing — pricing is guesswork
- Owner is the bottleneck on every decision
- Cash flow chaos — profitable on paper, broke in the bank
- No documented processes — it all lives in heads
- Idle or double-booked crews

WHO IT'S FOR

Owner-operated home service companies doing \$2M–\$20M — roofing, HVAC, plumbing, electrical, landscaping, pest, painting, garage door, pool.

HOW IT WORKS

- **Discovery call** (30–45 min) to confirm fit.
- **Pre-diagnostic intake** — a short written form on your numbers and stack.
- **90-minute working session** + document review.
- **Findings + roadmap** walked through live, delivered as a PDF you keep.

- No KPIs — decisions made on gut, not data
- High callback / rework rate bleeding margin
- Leads going cold from slow follow-up
- Paying for software you use 20% of
- No scorecards or review cadence

IT PAYS FOR ITSELF

The full \$997 credits to Month 1 of any fractional COO retainer signed within 30 days. Find the problems, then fix them — the diagnostic comes off the top.
